

Accessing your storm.usc.edu account through AFP (Mac OS X):

- 1) In "OS X", click on the desktop background to bring up the "Finder" options at the top in the white bar
- 2) Click "Go" -> "Connect to server"
- 3) Enter the address "afp://storm.usc.edu" and click the connect button
- 4) Enter your username and password (IML Portal login)
- 5) OS X will then bring up a dialogue box asking you which drive to mount. Click the drive that corresponds with your username
- 6) You will then be presented with the contents of your space on storm. Storm is mounted as a drive on your computer and an icon of the server will appear on your desktop and also in the side column of finder windows.
- 7) Double-click on the your username "drive" to open it and browse it.
- 8) Open the "Sites" folder. This is the folder to place your web content.

The resulting URL is:

If I place the file "tommy.html" into my account's Sites folder, I can access it at this URL:

<http://storm.usc.edu/~ttrojan/tommy.html> where ttrojan is your username

Accessing your storm.usc.edu account through SFTP (Windows and Mac OS X):

- 1) Download the FileZilla Client
- 2) Once installed and open, you will see an interface with connect options at the top, and two regions in the middle. The left region is 'your computer'; the right is the 'server'.
- 3) At the top of FileZilla, enter the host "sftp://storm.usc.edu", then your username and password (from the IML Portal). You'll see movement in the bottom status box then you'll see folders appear in the right region.
- 4) In the left region (your computer) find your file(s) on your computer. In the right region (server) navigate to the "Sites" folder.
- 5) For files you wish to upload, drag from the left region to the right region. Dragging more than once will overwrite the existing file.

The resulting URL is:

If I place the file "tommy.html" into my account's Sites folder, I can access it at this URL:

<http://storm.usc.edu/~ttrojan/tommy.html> where ttrojan is your username
